Abstract of JP6270097

PURPOSE:To produce a roll paper such as a toilet paper in a large quantity at one time by cutting it simply and speedily so that a cut surface is put in extremely good order while giving extremely small vibration in the feed direction of a long size raw material of the roll paper. **CONSTITUTION:**A belt like blade 5 is arranged so as to be drivable by winding it between an upper wheel 3 and a lower wheel 4. This is arranged in a plurality, and a feed means C is arranged laterally between the upper wheel 3 and the lower wheel 4. A clamp 12 capable of hugging and holding a raw material P of a roll paper is arranged in the feed means C, and a vibration generating means B is arranged to give extremely fine vibration in the feed direction of the raw material P of the roll paper.
